**Web Application Engineer** | Off the Record (offtherecord.com)

**June 2016 – September 2016**

- Improved customer experience, searchability, and reduced call-handling time by developing and maintaining new front-end tools using HTML, CSS, JavaScript, AngularJS, Git.
- Reduced time spent on calls by 30% through extracting related data from several databases and displaying it on one screen for easy access.
- Utilized GitHub to build and deploy new web applications to Amazon Web Services (AWS).
